EDUCATION

Unimar University Margarita, Nueva Esparta, VE | Bachelor of Science, Engineering Systems | 2016

- Cumulative GPA: 4.0 (Excellent Academic Performance).
- Relevant Coursework & Skills: Engineering Systems degree provides a strong foundation in computer science principles, problem-solving, and logical thinking directly applicable to software development. Exceptional GPA (4.0) demonstrates dedication and excellence in a technical field.
- Udemy Courses: Extensive supplementary training in software development technologies including Java, C#, Javascript, .NET, HTML, CSS, PHP, Ionic, and more. Showcases commitment to continuous learning and practical skill acquisition in diverse programming languages and platforms.
- Coursera Courses: Specialized training in Front-end and Back-end development with React, including "React Basics", "Avance React", and "Introduction to Back-end development." Demonstrates proactive approach to mastering modern web technologies and Full-Stack development, aligning with job requirements.
- Core Competencies Acquired:
 - Software Development Life Cycle (SDLC).
 - Algorithms and Data Structures.
 - Programming Principles and Design.
 - Database Design and Management.
 - Operating Systems (Linux, Unix, Windows Server/IIS).
 - .NET/C# Web Platforms.
 - React Native apps, Expo iOS and Android.
 - **Advanced experience with Tanstack Query and Zustand for efficient state management and data optimization in frontend applications.**
 - **Development of secure RESTful APIs with NestJS, including authentication, authorization, and vulnerability protection.**
 - **Strong focus on application security and optimization in production environments.**
- Experience and in-depth knowledge in UiPath Robotic Process Automation (RPA) and Automation, including designing, developing, and deploying automated workflows to optimize business processes. React Native apps with Expo for iOS and Android. Focus on modern web development with React, Next.js, and Vercel for building scalable and performant applications.
- Experience and knowledge in Artificial Intelligence (AI), including the use of large language models (LLMs) such as GPT and Gemini for the development of innovative applications, as well as in the creation of AI solutions for process automation and optimization. Proficient in Artificial Intelligence (AI), encompassing the application of large language models (LLMs) like GPT and Gemini for developing innovative applications and crafting AI solutions for process automation and optimization.

WORK EXPERIENCE

- **It Drive C.A. - Argentina, Venezuela**

Specialized in automation and UiPath RPA to streamline business processes. Highly proficient Full Stack Developer with expertise in developing and maintaining comprehensive web applications utilizing PHP (Laravel) framework. Skilled in database management, including MySQL and SQLite. Adept at designing responsive user interfaces leveraging CSS, Bootstrap, Grid, and Flexbox. Experienced in creating desktop applications with C# and Java. Proven ability to program robust back-end services using C# (Visual Studio). Specialized in automation and implementing UiPath RPA solutions to optimize business processes.

- **Freelance Backend Developer (.NET C#)**

Developed and maintained robust backend services and APIs using .NET and C# for various client projects. Designed and implemented database solutions, ensuring data integrity and efficient performance. Collaborated with front-end developers to integrate user interfaces with backend logic. Provided technical support and troubleshooting for deployed applications.

Designed and maintained robust backend services and APIs utilizing .NET and C# for diverse client projects. Engineered and deployed database solutions, upholding data integrity and optimizing performance. Liaised with front-end developers to seamlessly integrate user interfaces with backend logic. Delivered comprehensive technical support and troubleshooting for deployed applications.

- **Nesty C.A. - Owner/Full Stack Developer**

Currently working at my own company, Nesty C.A., where I specialize in the development of web pages and mobile applications. My responsibilities include the design, development, and implementation of solutions using modern technologies such as React, TypeScript, Next.js, NestJS, and PostgreSQL. Additionally, I apply web architecture principles and cybersecurity to ensure the robustness and protection of systems.

Currently operating Nesty C.A. as the owner and full-stack developer, specializing in the development of web pages and mobile applications. Responsibilities encompass the design, development, and implementation of solutions utilizing contemporary technologies such as React, TypeScript, Next.js, NestJS, and PostgreSQL. Furthermore, web architecture principles and cybersecurity measures are applied to ensure system robustness and protection.

PROJECTS

- Development of a NestJS and GraphQL [API](#) for an e-commerce application called Flowpick.
- Development of a C# application for managing Animalitos Plus bets.
- Creation of a property rental website: [calot](#).
- Digital portfolio: [My Curriculum](#).
- Development of a chat application using GPT/Gemini technology: [Chat GPT \(Gemini\)](#).
- Financial management application: [FinancePro](#).
- QR code generation application: [QR-Printer](#).
- Weather forecasting application: [Weather app](#).
- E-commerce store website: [E Commerce store](#).

LEADERSHIP & INVOLVEMENTS

- **Full-Stack Application Development & Deployment:** Led the end-to-end development of a food delivery application using Ionic for the front-end and a comprehensive REST API for the backend. This involved architectural design, coding, rigorous testing, and deployment to ensure a robust and scalable solution.
- **System Design & User Experience (UX) Leadership:** Spearheaded the design of intuitive system interaction screens, encompassing detailed diagrams, clear access points, and user-centric views. This included defining the visual aesthetics and methodological approach to optimize user engagement and system usability.
- **API Integration & Optimization:** Successfully integrated and optimized RESTful APIs to ensure seamless communication between the mobile application and backend services, enhancing data flow and overall application performance.
- **Cross-Functional Collaboration:** Collaborated effectively with stakeholders to gather requirements and translate business needs into technical specifications, ensuring project alignment and successful delivery.
- **Problem-Solving & Troubleshooting:** Demonstrated strong analytical and problem-solving skills in identifying and resolving complex technical issues throughout the development lifecycle, ensuring application stability and reliability.

SKILLS & INTERESTS

A highly motivated individual with a passion for professional endeavors, driven by innovative projects and a desire for excellence. A rapid learner with a strong focus and commitment to meticulous, organized work. Daily tasks are strategically planned to achieve defined objectives. A highly motivated individual with a passion for professional endeavors, driven by innovative projects and a desire for excellence. A rapid learner with a strong focus and commitment to meticulous, organized work, daily tasks are strategically planned to achieve defined objectives.
